TELES VoIP and Mobile Gateways receive Siemens "HiPath ready" certificate

TELES, the Berlin based access gateway vendor, has been awarded Siemens Enterprise Communications "HiPath Ready" certificate following a rigorous interoperability test. TELES participated in the HiPath Ready program in order to meet the telecommunications market's requirements for speed and interoperability.

As part of the "HiPath Ready" certification program, Siemens checks the compatibility of partner products and their ability to integrate with selected HiPath systems. On behalf of the Technology Partner, Siemens performs extensive integration and function tests.

The TELES Access Gateways product family enables PBX connection to VoIP networks, TDM, and mobile networks (GSM/UMTS). Following the successful completion of the interoperability test, existing HiPath 4000 and OpenScape Voice SIP-based softswitches now have an alternative for extending their services to all kinds of networks.

When asked about the benefits of certification, Thomas Haydn, TELES Product Marketing Director, said: "We are proud to receive the HiPath Ready award in recognition of the compatibility, reliability, and flexibility of TELES products and their ability to fit in to the Siemens HiPath and OpenScape Voice systems."

The TELES VoIPBOX provides HiPath and OpenScape Voice customers with a VoIP gateway with several TDM interfaces, transcoding, SIP to H.323 protocol conversion, remote survivability, and emergency break-out support. In addition, the TELES iGATE mobile gateway enables VoIP/TDM calls to be terminated in GSM/CDMA and UMTS networks, allows email to SMS and SMS to email conversion, as well as enabling least cost routing to different mobile networks.

About TELES

TELES provides worldwide wireline and wireless telephony service providers with complete Class 4 and Class 5 soft switch solutions, VoIP gateways, and mobile gateways for GSM, CDMA, and UMTS networks. Celebrating, this year, our 25th anniversary, we are proud of our successful track record having deployed more than 200 live carrier and service provider networks with millions of voice ports.

A Deutsche Boerse Prime Standard listed company with headquarters in Berlin, Germany, TELES is a global NGN player with offices in Western Europe, Asia Pacific, and Latin America. We maintain a worldwide network of distribution channels, system integrators, and technology partners.
